

Maximo-As-A-Service Hosting in the Cloud

What is Maximo as a Service? Maximo-as-a-Service (MaaS) is an annual subscription that provides customers with a secure, dedicated Maximo application via the Internet or “cloud” environment. Cohesive provides basic IT administration and Help Desk (FIRSTCall) support to MaaS customers as part of the solution.

Why MaaS?

MaaS is a low maintenance affordable solution that offers high availability, security, and performance. This solution relieves the headache of maintaining Maximo and the hardware needed to run Maximo.

Benefits of MaaS

- Fast and reliable Help Desk Support from Cohesive’s FIRSTCall
- System administration support and upgrades
- Maximo expertise
- Quicker time to “GO-LIVE”
- Lowers your total cost of Ownership

Cohesive Offers Premier MaaS Solutions:

- Computing Hardware Infrastructure - (Hardware, Network)
- Computing Software Infrastructure - (OS, Database, Application Server, Network Management software, Subscription access to Maximo)
- Redundancy support for network access
- Backups
- 24 x 7 Application Service Monitoring
- Required Maximo patch installations
- 99.9% Availability in a SaS 70 Type II Secure Data Center
- FIRSTCall Maximo support
- Access to a 2nd environment for Testing/Development
- Access to online Maximo training
- Disaster Recovery (optional service)

Cohesive provides asset-intensive organizations with solutions that optimize enterprise processes and information technology. Serving both public and private clients, we have established ourselves as the premier consulting and system integration firm focusing on asset, work, and supply chain management solutions.
