

# Cohesive MAS Hosting:

## Simplifying Complexity, Securing Success

### Seamless MAS Migration, Simplified Hosting

Switching to IBM Maximo Application Suite (MAS)? You're not alone. As businesses prepare for the mandatory transition to IBM MAS by September 2025, ensuring a smooth, secure, and efficient hosting strategy is critical. The transition and complexities of Red Hat OpenShift and MAS can be daunting, particularly as enterprises continue their core business operations and want a disruption-free migration. Enterprises are turning to hosting solutions as a strategic way to meet the deadline while staying focused on their core business.

This is where Cohesive MAS Hosting Services comes in. As an IBM Platinum Partner, we offer a comprehensive, turnkey solution that simplifies MAS deployment, management, and security while ensuring an optimal end-user experience.

### Challenges Faced by Organizations Transitioning to MAS

**Complex learning curves with Red Hat/OpenShift**

**Managing secure deployments and updates**

**Limited internal resources for infrastructure management**

**Need for scalable, efficient, and compliant hosting solutions**

# How Cohesive Makes Hosting Simple

The hosting option should streamline your MAS journey instead of adding complexity. And so, Cohesive's MAS Hosting goes beyond infrastructure, enabling organizations to thrive.

Here's how we simplify the MAS journey:

## Comprehensive Hosting and Managed Services

- End-to-end provisioning, installation, and maintenance of MAS infrastructure
- Includes networks, servers, storage, middleware, and databases
- Ongoing management of security, backups, and performance

## Streamlined Deployment

- Simplified image pulling and workload configuration
- Easy customization through archives for increased deployment flexibility
- Built-in monitoring and logging within Red Hat OpenShift

## Seamless Integration

- Deploy complementary MAS applications alongside Maximo Manage
- Configure messaging providers for smooth communication (JMS, IBM MQ, Kafka)

## Optimized Database and Storage Management

- Efficient management of Maximo databases with cluster deployments
- Seamlessly handle document storage through IBM Cloud Object Storage

## Tailored Security and Compliance

- Multi-layered security with encryption, VPNs, and SSL/TLS protocols
- Hosted in dedicated, isolated environments with compliance certifications (SOC 1, 2, 3, ISO 27001)

## Why Trust Cohesive for MAS Hosting

Our hosting services don't just deliver infrastructure—they ensure peace of mind.

### Here's why organizations trust Cohesive:

Decades of Maximo Expertise with IBM.

Complete MAS Hosting, Deployment to Management.

Private, Isolated Cloud for Each Customer.

Flexible Hosting for Evolving Business Needs.

Future-Ready: Easily navigate IBM's lifecycle policies.

24/7 global support for smooth operations.

## Our Infrastructure Advantage

Powered by AWS  
Virtual Private Cloud

Configured for  
high availability

Automated backups  
and disaster recovery
