

End-to-End Maximo Services

Support, Scale, and Modernize Your Asset Management Solution

Unlock Maximo's Full Potential with Cohesive's Expert Support

Whether you're implementing Maximo Application Suite for the first time or looking to optimize existing solutions, Cohesive is your trusted partner every step of the way. Our service delivery experts help you unlock the full value of Maximo faster so you can extend asset life, reduce maintenance costs, and demonstrate the ROI of your Enterprise Asset Management program.

Our Maximo Services Portfolio

Assessments and Benchmarks

Ensure that your system is performing as it should be and identify any gaps or points of friction.

Maximo Health Checks

Configure your application for peak performance, eliminating inefficient code, SQL and Java errors, or memory leaks.

ISO 55000 compliance and regulatory assessments

Map your compliance requirements to current asset management systems and workflows.

MAS Readiness Assessments

Build your step-by-step plan to upgrade from legacy Maximo to the latest version of MAS.

License Checks

Right-size your licenses and prepare for the AppPoints licensing model.

Upgrade Services

Transition from Maximo version 7.6.x (or earlier) to Maximo Application Suite (MAS) with confidence. You can focus on your business while Cohesive handles:

- Upgrade planning and timelines
- Implementation and deployment
- System configurations and integrations
- Testing, QA, and change management
- Project management

Reliability Services

Adopt a reliability-driven approach to Enterprise Asset Management to extend the functional performance of assets and increase the Mean Time Between Failures (MTBF).

Operationalize your reliability strategy with:

- Criticality assessments to determine the appropriate methodology – Reliability-Centered Maintenance (RCM), Failure Mode Effects and Analysis (FMEA), or Preventive Maintenance Optimization (PMO) – for each asset or asset type in your inventory
- Seamless integration between EAM and reliability solutions, including MAS and third parties
- Guidance from our team of Certified Reliability Leaders (CRL)
- Expert-led workshops for reliability planning, technical requirements, asset risk assessments, and change management strategies
- RCM studies executed by Cohesive experts in the field
- Staff augmentation, coaching, and training

Custom Workflow Design & Implementation

Ensure Maximo's configuration is tailored to your unique environment, operational processes, and user needs. Backed by deep domain expertise and cross-industry experience, we go beyond basic technology implementation, acting as your true partners. Working closely with your team, we help you build workflows that simplify user experiences, drive adoption, and ensure long-term system stability. What you get:

- Business-aligned workflows grounded in operational needs
- Simplified user experience for both administrators and field staff
- Stable configurations and integrations that are fully supported and scalable

System Integrations

Ensure Maximo integrates seamlessly with business-critical systems, such as ERP, GIS, and SCADA, for real-time data visibility and 360-degree enterprise asset lifecycle management.

Advancement Services Program (ASP)

Choose our flexible ASP solution designed for organizations to make continuous improvements, have readily available resources, and streamline purchasing. With this option, you can obtain multiple services to use when you need them, including:

- Health assessments and tailored action plans
- Minor release upgrades
- Support for customizations and integrations
- Application support calls

Your Trusted Partner for Maximo Success

Cohesive is your trusted partner for achieving operational efficiency, reliability, and continuous improvement for your asset management program. Whether modernizing your platform, optimizing performance, or connecting systems across your enterprise, we can help maximize the value of your Maximo investment—now and in the future.
