

# MaxEdit: Simplify Record Renaming in Your Maximo Environment

Renaming key records, such as locations or assets in Maximo, can be complex in asset-intensive enterprises. Renaming may require third-party services, IT involvement, or outdated tools, leading to delays, added costs, and potential data inconsistencies.

Cohesive's MaxEdit is a powerful, built-in Maximo add-on that empowers administrators to rename directly within the Maximo interface. Whether locations, assets, companies, or other critical records, MaxEdit streamlines the renaming process, eliminating the need for external services or complex procedures.

## How It Works

MaxEdit ensures that your Maximo environment stays clean, accurate, and reflective of your business reality—without the hassle.

**Access MaxEdit directly within Maximo**

**Select the record type—location, asset, company, or others.**

**Rename as needed**

**Confirm changes and keep data updated**

## Why Choose MaxEdit?

**Built-In Convenience:**  
Operate seamlessly within the Maximo interface without the need for external tools

**Cost-Effective:**  
Avoid costly service engagements for renaming tasks

**Empower Users:**  
Enables users to rename records without IT involvement

**Data Accuracy:**  
Ensures Maximo records are current and accurate

**Get Started with MaxEdit today.**

**Simplify record renaming and take control of your infrastructure.**
